Kennesaw, Ga 30152

TREATMENT ROOM POLICY

To Parents and Guardians,

Our very special thanks to you for entrusting your child's dental care to Children's Dentistry of West Cobb and it's outstanding team. Your child is now part of our family, and we will do everything we can ensure his/her safety and comfort for each visit. It is very important that your child obtains and maintains a level of trust with us that will help him/her a healthy smile for the rest of his/her life.

Our office policy respectfully asks for parents and guardians to remain in the waiting area while your special person is being treated unless the doctor request the parents be brought into the treatment room.

CANCELLATION POLICY

A 24 hour advanced notice is required in order to change a reserved appointment and to avoid a missed appointment fee of \$25.00.

HYGIENE POLICY

Due to the increasing evidence of plaque, tartar and cavities among children 3-17, the American Dental Association recommends a fluoride treatment every 6 months for every child. Unless specified, every child to the age of 14 will receive a fluoride treatment every 6 months. Since we are unable to detect cavities between the teeth without x-rays, we are required to take cavity detecting x-rays every 6 months on every child to ensure early detection of cavities. Therefore, unless you sign the REFUSAL below, each child will receive x-rays every 6 months. Most insurance companies cover the cost of x-rays 2 times per year. We appreciate your cooperation
